GAZA CARE BRIDGE INITIATIVE

Gaza Care Bridge initiative is a coalition of Don't Look Away e.V. and Friends of Standing Together Germany, advocating to improve access to medical care for people in Gaza.

The medical situation in Gaza is extremely critical. Much of the healthcare system has been destroyed, leaving thousands without essential treatment. Around 18,500 patients are on WHO waiting lists for urgent, often life-saving care unavailable locally. Many need specialized treatment only accessible abroad, including in Europe, but access is being politically blocked. This is where we focus our efforts.

We believe healthcare is a human right. Our mission: Support improving access to medical care for Gaza's sick and injured—by strengthening local healthcare and enabling evacuations for urgent treatment abroad.

What we advocate for:

- **Ending the visa blockade** – To allow patients and caregivers into Germany and admit patients in-need to life-saving treatment.
- **Opening humanitarian corridors**– To ensure safe medical access in the West Bank and East Jerusalem.
- **Improving local healthcare** – By strengthening Gaza's healthcare system and humanitarian aid in Gaza

How we take action:

- **Mobilize public pressure** – Demand urgent medical access for Gaza.
- **Run petitions** – Call for severely injured children to be admitted to German hospitals
- **Build networks** – Unite civil society for collective impact.
- **Push political action** – Advocate at local, national, and EU levels.

Join our initiative today – Your voice can change lives.

1. Scan the QR code – Sign the petition in seconds.
2. Amplify our message – Share our flyers far and wide.

Every action counts – Together, we can open doors to life-saving care.
